TRAINING PROJECTS

1. **3 Bills Problem;** Calculating who owes how much money to whom after the split payments.
2. **Round Robin;** Scheduling matches between teams in such a way that every team gets an opportunity to play with other teams, and no 2 teams face other again.
3. **Version Control;** Calculating total number of published versions, along with highest contributing authors towards publishing of app updates, as well as sorting the publishing versions based on number of bugs the particular version has fixed.
4. **Tennis Grand Slam Draw;** This project was intended to schedule matches between players based on ranking or rating of each player. So using probability distribution and Math random function it has to be proved that the Player 8 has less than 9% chance to win against the Player 1.
5. **Heads you Win;** This project was intended to get the score based on tosses conducted by computer & player. The tosses carried out was in the interval of 1 second and total 4 rounds. Each rounds has 10 tosses. The output, who leads by how many heads was being consolded out after every round.
